

The Great Inflate Frequently Asked Questions

Delivery and Set-Up

The Great Inflate will deliver, set up and take down the equipment. Set up and pick up normally takes about 15-30 minutes. Rentals are all day rentals. All day is 6-8 hours. Overnight rentals are available.

Location of set up:

The best place for set up would be a level grassy area. Sandy areas tend to track sand into inflatable. All inflatable's are anchored down. If you need to set up on concrete, asphalt please let us know. Make sure there are no underground irrigation pipes and/or buried telephone cables or electric lines close to the perimeter of the bounce site.

Please do not run sprinklers or mow lawn the same day in the setup area. Please make sure the setup area is clear of any waste/debris.

Power source & Water source:

All of the items require a power source. The standard household outlet (110) will be fine. If you are having the party at a park please check on the power source. A generator can be rented for an additional charge. Water slides will need to be able to connect your garden hose.

Space required for set up:

Please allow a 20' by 20' area for the standard moonwalk. Keep in mind that moonwalks also have different heights from 15' to 24'. Our water slides range from 30' to 51' in length so ask about the space required for the slide you are requesting.

Contract/Waiver:

The inflatable item will not be set up unless the contract/ liability waiver is signed.
